

SUMMARY

M.R. Bakshi, K.K. Baishya, T. Barman – <i>Characteristics of generalized weakly phi-symmetric Kenmotsu Manifolds</i>	1
Yogita Mukundraj Ahire – <i>On a new class of Volterra-Fredholm fractional integral equations</i>	17
Yi-Xin Luo, Xiu-Min Zheng – <i>Growth of meromorphic solutions of complex linear differential-difference equation with meromorphic coefficients of logarithmic order 27</i>	
M.A. Moreno-Frias, J.C. Rosales – <i>The ideals of a numerical semigroup with embedding dimension two</i>	43
H. Shayanpour, A. Nematizadeh – <i>Common best proximity point and best proximity point for cyclic contractions and semi cyclic contractions on probabilistic Menger spaces</i>	61
D.A. Afariogun, A.A. Mogbademu – <i>On double integrals of Henstock-Kurzweil on time scales</i>	89
Bikiran Das, Kanak Kanti Baishya– <i>Non-metric connection on generalised weakly symmetric manifolds</i>	103
A. Küçük – <i>The classification of curves on the dual unit Lorentz sphere</i> ...	115
